 IP Address:

PAGE 2: Section I - Identification

Q1: Please provide the following details (*compulsory):

Your name:	Maria Bjerre
Name of organisation* (if applicable):	LO-Denmark
Town/City:	Copenhagen
Country*:	Denmark
E-mail address:	
Transparency Register ID number (if applicable):	Lands116076157

Q2: Please indicate if you are responding to this questionnaire on behalf of/as:

d) a consumer organisation/trade union/environmental organisation/non-governmental organisation

Q3: Received contributions may be published on the Commission's website, with the identity of the contributor. Please state your preference with regard to the publication of your contribution:

My contribution may be published under the name indicated

Q4: We might need to contact you to clarify some of your answers. Please state your preference below:

I am available to be contacted

PAGE 3: Section III – Problem definition and objectives

Q5: Please rate the importance of the following objectives on a scale between 1 (not important at all) and 5 (very important).

a) Provide decision makers, regulatory authorities and professional users with information that allows for an appropriate response to health or environmental risks of nanomaterials	5
b) Provide consumers with relevant information on products containing nanomaterials on the market	4
c) Maintain competitiveness and innovation of businesses bringing nanomaterials or products containing nanomaterials to the market (including SMEs)	4
d) Ensure consumer trust in products containing nanomaterials	5
e) Ensure the availability of relevant information on the presence of nanomaterials or products containing nanomaterials on the market	5
f) Ensure the proportionality of the information requirements and the associated costs and administrative burden.	3
g) Protect confidential business information	3
Please provide additional comments	a nano register and sharing of information will support both modern competitiveness and good occupational Health and safety.

Q6: To what degree (from 1 - not at all to 5 - fully) does the current legislative framework (including the REACH and CLP Regulations and product-specific legislation) and the currently available databases (including the JRC web platform, see http://ihcp.jrc.ec.europa.eu/our_databases/web-platform-on-nanomaterials) meet the following objectives?

a) Provide decision makers, regulatory authorities and professional users with information that allows for an appropriate response to health or environmental risks of nanomaterials	1
b) Provide consumers with relevant information on products containing nanomaterials on the market	1
c) Maintain competitiveness and innovation of businesses bringing nanomaterials or products containing nanomaterials to the market (including SMEs)	3
d) Ensure consumer trust in products containing nanomaterials	1
e) Ensure the availability of relevant information on the presence of nanomaterials or products containing nanomaterials on the market	1
f) Ensure the proportionality of the information requirements and the associated costs and administrative burden.	2
g) Protect confidential business information	3

Q7: To what extent do you agree with the following statements from 1 (strongly disagree) to 5 (strongly agree):

a) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is insufficient for an adequate response to health and environmental risks	5
b) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is insufficient for informed consumer choice	5
c) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is detrimental to consumer trust	5
d) The available information on the presence of nanomaterials and products containing nanomaterials on the market is presented in an incoherent or ineffective way	5
e) The establishment of national registries and notification schemes causes market fragmentation and hampers trade within the internal market	5
Please provide additional comments	The current level of information is not sufficient to provide workers with enough information about the risks they may encounter

PAGE 4: Section IV – Health and environmental aspects

Q8: With regard to health and environmental hazards and risks of specific nanomaterials/types of nanomaterials, please tick the relevant boxes:

I am aware of health and/or environmental hazards of specific nanomaterials/types of nanomaterials

,

I am not aware of any classified nanomaterials,

I am not aware of any DNELs/PNECs/OELs set for specific nanomaterials/types of nanomaterials

,

I am aware of significant exposure of workers/users/consumers to specific nanomaterials/types of nanomaterials

,

Please explain your responses (if any, please report the nanomaterials, the health and/or environmental hazards, any relevant classification, any DNELs/PNECs/OELs, any exposure and in which condition):

Attention should be made to nanotubes and fibers and other very harmful substances

Q9: With regard to the past and current use of nanomaterials (tick the relevant box):

I am not aware of any health and/or environmental incidents which have occurred

Q10: The establishment of an EU nanomaterial registry (tick the relevant box):

Would significantly contribute to reducing the health and/or environmental risks related to the use of nanomaterials

PAGE 5: Section V – Consumer trust

Q11: In case information on the presence of nanomaterials in specific products were made available, what impact do you think this would have on consumers? (Please tick all that would apply)

a) They would be more inclined to purchase those products

,

d) They would search for more information

Q12: Do you believe that the public availability of information on the presence of nanomaterials in products would be likely to...(choose one of the following answers)

a) generate trust among consumers and the broad public, and thus have a positive effect on the market for the concerned products

,

Comments:

It will help to have a more informed choice

PAGE 6: Section VI - Innovation and competitiveness

Q13: With regard to innovation, do you believe that information on nanomaterials and products containing nanomaterials that could be gathered in a nanomaterial registry would...(choose one of the following answers)

a) stimulate innovation (e.g. through increased consumer trust, increased awareness on nanomaterials)

,

Comments:

A demand for less harmful nanomaterials and solid information concerning safe use of these materials could help stimulate innovation

Q14: With regard to competitiveness of EU companies manufacturing nanomaterials or products containing nanomaterials, do you believe that information on nanomaterials and products containing nanomaterials that could be gathered in a nanomaterial registry would...(tick all that apply)

a) stimulate intra-EU competitiveness,

b) enhance the competitiveness of European companies against extra-EU companies

PAGE 7: Section VIII – Possible options and exemptions

Q15: What would be the added value of a notification per use (i.e. for each mixture/article) compared to a notification per substance? – Please consider the usefulness of the information for public authorities, downstream user companies, workers and consumers.

The added value of a notification per use is the availability of information on both uses of, and exposure to, nanomaterials. Such information will motivate end-users to improve the level of protection of the consumers and workers. The main route for information about nano based products shall go Down the stream, as end-users themselves often have little knowledge about the content of nano.

<p>Q16: Which actors along the supply chain should be subject to notification requirements? (tick all that apply):</p>	<p>a) Manufacturers of nanomaterials,</p> <p>b) Importers of nanomaterials,</p> <p>c) Downstream users (e.g. re-formulators, manufacturers of products containing nanomaterials)</p> <p>,</p> <p>d) Distributors to professional users (e.g. wholesalers)</p> <p>,</p> <p>e) Distributors to consumers (e.g. retailers)</p>
<p>Q17: The following should be subject to notification requirements (tick all that apply):</p>	<p>a) Substances,</p> <p>b) Mixtures containing nanomaterials,</p> <p>c) Articles with intended release of nanomaterials</p> <p>,</p> <p>d) Articles containing nanomaterials without intended release</p> <p>,</p> <p>Please explain: Further explanation of the meaning of intended and non-intended release would be usefull.</p>
<p>Q18: Is there a need to exempt certain types of nanomaterials?</p>	<p>No, all kinds of nanomaterials should be subject to notification obligations</p>
<p>Q19: Is there a need to exempt certain uses of nanomaterials?</p>	<p>No, all uses of nanomaterials should be subject to notification obligations</p>

PAGE 8: Section IX – Nanomaterials Observatory

<p>Q20: If a Nanomaterials Observatory is established instead of an EU-wide registry, what type of information should be collected? (please tick all that apply)</p>	<p>a) Information from existing notification systems,</p> <p>b) Information from market studies on nanomaterials and products containing nanomaterials</p> <p>,</p> <p>c) Information on the use of nanomaterials across Europe</p> <p>,</p> <p>d) Information concerning products containing nanomaterials</p> <p>,</p> <p>e) Information on the hazards and risks of nanomaterials</p>
<p>Q21: How should the information in a Nanomaterials Observatory be presented in order to reach the consumers, workers and authorities?</p>	<p><i>Respondent skipped this question</i></p>

PAGE 9: Section X - Potential use and benefits of a nanomaterial registry

Q22: In what ways could the information on nanomaterials from registries be potentially useful (tick all that apply):

- a) Risk assessment and/or risk management,
- b) Enforcement of worker protection,
- c) Promotion of safe use of nanomaterials in products
- ,
- d) Development of strategies to ensure the safe use of nanomaterials
- ,
- e) Informed purchasing decisions by consumers,
- f) General education of the public

Q23: Please give a justification for your views (presented in the previous question) and describe which data would be necessary to allow the desired use (e.g. would information on substances alone be enough for informed consumer purchase decisions, or would this require information for each concerned product):

The register should be used to inform the nanomaterials users about the existence of nanomaterials, risks, opportunities for replacement and the necessary preventive measures on the specific materials and products containing nanomaterials-

Q24: What would be the added value of a European nanomaterial registry beyond the current framework of chemicals legislation, including REACH registration?

Establishing a nanomaterial registry in the EU is crucial to ensure traceability and to guarantee to all Citizens their right to know what they Work with, what they buy, what they consume and how their choices affect society and the environemnt.

Q25: Please provide any other comments that you would like to share regarding transparency measures for nanomaterials on the market.
