by Marie-Hélène Pradines, Head of Unit, European Commission, Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs (DG GROW)

About the Textiles Ecosystem Transition Pathway

The [Textiles Ecosystem Transition Pathway](#) was published in June 2023. It identifies 50 actions for the green and digital transition of the EU textiles ecosystem, and for improving its resilience and competitiveness. As part of the co-implementation process of the Transition Pathway, the European Commission published a [call for commitments](#) for stakeholders to help implement the pathway. The call for commitments is continuously open and we encourage stakeholders to submit new pledges.
