ADMINISTRATIVE BURDEN						
Presoja učinkov predpisov na gospodarstvo, posebej na MSP (MSP test)	SME test	All ministries	No	Implemented		The SME test application is a software solution that supports the process of assessing the impact of emerging regulations on the economy, especially on micro, small and medium-sized enterprises (SMEs). The SME test helps the draftsman to formulate draft regulations and policies. This can contribute to the objectives of the drafters without unduly limiting or in any way reducing the opportunities for SMEs in the market and limiting the development of the business environment. The main advantages of the SME test are thus increasing the transparency of legislation, comparing different regulatory alternatives and preparing quality

						<p>starting points for policy makers who choose the optimal measures to ensure the objectives of the legislation.</p> <p>The application SME test, based on SCM, is directly connected to the Business Register at the Agency of the Republic of Slovenia for Public Legal Records and Related Services as well as to Legal Information System of the Republic of Slovenia (PIS). With direct connection to the up-to-dated information it enables the preparation of an analysis of costs and benefits which also includes an assessment of possible alternative legislative solutions for SMEs, as well as exceptions and complete or partial exemptions for SMEs. The test helps the regulation-making authority in the formation of proposals of regulations as well as policies or responses to the method that will contribute to realizing the goals of regulation-making authorities without unjustifiably limiting or in any way reducing the opportunities of SMEs in the market or limiting the development of the business environment.</p> <p>There are two versions of application. First one is longer web-based tool called SME test enables the drafters and the public (citizens, business entities, economic and other interest groups) to quantify the impact of their alternative policy proposals on SMEs, in addition to substantiating their comments and proposals on a public policy proposal. Despite the tool's ease of use, it enables users to conduct more sophisticated analysis. The shorter version of the application is called MY Calculator and is available on the STOP the Bureaucracy website. The shorter version is prepared for the general public and in use when they are preparing proposals for better regulation. With this version can general public assessing the effects of particular activities in dealing with a country.</p>
