

# A strong European policy to support Small and Medium-sized enterprises (SMEs) and entrepreneurs 2015-2020

## Public consultation on the Small Business Act (SBA)

Fields marked with \* are mandatory.

### Introduction & background

---

Since its adoption in 2008, the Small Business Act (SBA) has proven its worth as a policy tool in support of the small and medium enterprises (SMEs). Various initiatives have been taken at both EU and national level to improve the environment in which these businesses operate and help them grow.

It is now time to reflect on what can be done in the years that lie ahead to make life easier for SMEs.

The Commission has drafted a consultation document including the on-going measures and the new proposals (see the link below).

This consultation is designed to collect feedback on the new initiatives set out in the consultation document.

**Please read it before you complete the questionnaire.**

The reduction of administrative burdens is focused on costs, but the interpretation of entrepreneurs is important too. If we want to change the opinion of entrepreneurs on EU-regulation, we have to give attention to the workability, utility and functionality of rules. Therefore a good dialogue between businesses and the (EU) government is necessary: communication and explanation.

With regard to licenses: there may be reasons for some permits to take longer than a month (research takes time, precautions). More important is transparency and ease of the application process.

Access to finance for SMEs is the main problem. Therefore, in the first place, the focus should be on resolving bottlenecks and understanding what SMEs need and then secondly on the finance alternatives an sich.

#### 4.4 Any further suggestions or comments?

*1,500 character(s) maximum*

We have strong reservations on the added value/usefulness of EU actions providing direct support to SMEs to do business outside the EU (in particular: missions for growth & EU SME centres) and also a target that would ONLY focus on doing business outside the EU. Due to the fact that the initial export orientation, of especially small companies, is focused on the nearby and more easily accessible EU internal market, it is and most likely shall remain the most important market for SMEs. Therefore, logically, the percentage of SMEs that export outside the EU is substantially lower than that of those that export within the EU. However and evidently, SMEs should certainly be encouraged to benefit from growth of markets outside the EU. In doing this, the EU should focus on DISMANTLING BARRIERS on third markets via bilateral and WTO negotiations and not on direct support to companies in third country markets (except IPR tools/IPR centres which are additional/complementary to MS activities). Member States have extensive networks delivering direct support (Chambers, Embassies) and being close to entrepreneurs, they are in a much better position to provide it. Therefore, we support programmes from the Commission that enable member states to support entrepreneurs in third countries, such as Gateway to Japan and Understanding China.
