PAGE 2: Section I - Identification

Q1: Please provide the following details (*compulsory):

Your name:	GENAY
Town/City:	URIMENIL
Country*:	FRANCE
E-mail address:	

Q2: Please indicate if you are responding to this questionnaire on behalf of/as:	a) an individual
-----------------------------------------------------------------------------------------	------------------

Q3: Received contributions may be published on the Commission's website, with the identity of the contributor. Please state your preference with regard to the publication of your contribution:	My contribution may be published under the name indicated
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------

Q4: We might need to contact you to clarify some of your answers. Please state your preference below:	I am available to be contacted
--------------------------------------------------------------------------------------------------------------	--------------------------------

PAGE 3: Section III – Problem definition and objectives

Q5: Please rate the importance of the following objectives on a scale between 1 (not important at all) and 5 (very important).

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| a) Provide decision makers, regulatory authorities and professional users with information that allows for an appropriate response to health or environmental risks of nanomaterials | 4 |
| b) Provide consumers with relevant information on products containing nanomaterials on the market | 4 |
| c) Maintain competitiveness and innovation of businesses bringing nanomaterials or products containing nanomaterials to the market (including SMEs) | 3 |
| d) Ensure consumer trust in products containing nanomaterials | 3 |
| e) Ensure the availability of relevant information on the presence of nanomaterials or products containing nanomaterials on the market | 4 |
| f) Ensure the proportionality of the information requirements and the associated costs and administrative burden. | 2 |
| g) Protect confidential business information | 4 |

Please provide additional comments

La transparence face aux nanoparticules est indispensable, compte tenu du peu de recul que nous avons actuellement sur ce genre de produits. Leurs caractéristiques en font des éléments importants au niveau industriel, et de la santé, il est donc nécessaire d'en promouvoir les recherches à leur sujet.

Q6: To what degree (from 1 - not at all to 5 - fully) does the current legislative framework (including the REACH and CLP Regulations and product-specific legislation) and the currently available databases (including the JRC web platform, see http://ihcp.jrc.ec.europa.eu/our_databases/web-platform-on-nanomaterials) meet the following objectives?

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| a) Provide decision makers, regulatory authorities and professional users with information that allows for an appropriate response to health or environmental risks of nanomaterials | 4 |
| b) Provide consumers with relevant information on products containing nanomaterials on the market | 3 |
| c) Maintain competitiveness and innovation of businesses bringing nanomaterials or products containing nanomaterials to the market (including SMEs) | 4 |
| d) Ensure consumer trust in products containing nanomaterials | 2 |
| e) Ensure the availability of relevant information on the presence of nanomaterials or products containing nanomaterials on the market | 3 |
| f) Ensure the proportionality of the information requirements and the associated costs and administrative burden. | 3 |
| g) Protect confidential business information | 3 |

Please provide additional comments

La legislation ne permet pas aux consommateurs lambda, de se faire une idée sur ce que sont réellement les nanotechnologies, leurs utilisations et leurs eventuels risques ; seules les industries ont un cahier des charges importants.

Q7: To what extent do you agree with the following statements from 1 (strongly disagree) to 5 (strongly agree):

a) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is insufficient for an adequate response to health and environmental risks	3
b) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is insufficient for informed consumer choice	3
c) The current level of available information on the presence of nanomaterials and products containing nanomaterials on the market is detrimental to consumer trust	3
d) The available information on the presence of nanomaterials and products containing nanomaterials on the market is presented in an incoherent or ineffective way	4
e) The establishment of national registries and notification schemes causes market fragmentation and hampers trade within the internal market	2
Please provide additional comments	Il n'y a pas à l'heure actuelle une transparence suffisamment importante face aux consommateurs.

PAGE 4: Section IV – Health and environmental aspects

Q8: With regard to health and environmental hazards and risks of specific nanomaterials/types of nanomaterials, please tick the relevant boxes:	<i>Respondent skipped this question</i>
Q9: With regard to the past and current use of nanomaterials (tick the relevant box):	<i>Respondent skipped this question</i>
Q10: The establishment of an EU nanomaterial registry (tick the relevant box):	<i>Respondent skipped this question</i>

PAGE 5: Section V – Consumer trust

Q11: In case information on the presence of nanomaterials in specific products were made available, what impact do you think this would have on consumers? (Please tick all that would apply)	<i>Respondent skipped this question</i>
Q12: Do you believe that the public availability of information on the presence of nanomaterials in products would be likely to...(choose one of the following answers)	<i>Respondent skipped this question</i>

PAGE 6: Section VI - Innovation and competitiveness

Q13: With regard to innovation, do you believe that information on nanomaterials and products containing nanomaterials that could be gathered in a nanomaterial registry would...(choose one of the following answers)

Respondent skipped this question

Q14: With regard to competitiveness of EU companies manufacturing nanomaterials or products containing nanomaterials, do you believe that information on nanomaterials and products containing nanomaterials that could be gathered in a nanomaterial registry would...(tick all that apply)

Respondent skipped this question

PAGE 7: Section VIII – Possible options and exemptions

Q15: What would be the added value of a notification per use (i.e. for each mixture/article) compared to a notification per substance? – Please consider the usefulness of the information for public authorities, downstream user companies, workers and consumers.

Respondent skipped this question

Q16: Which actors along the supply chain should be subject to notification requirements? (tick all that apply):

Respondent skipped this question

Q17: The following should be subject to notification requirements (tick all that apply):

Respondent skipped this question

Q18: Is there a need to exempt certain types of nanomaterials?

Respondent skipped this question

Q19: Is there a need to exempt certain uses of nanomaterials?

Respondent skipped this question

PAGE 8: Section IX – Nanomaterials Observatory

Q20: If a Nanomaterials Observatory is established instead of an EU-wide registry, what type of information should be collected? (please tick all that apply)

Respondent skipped this question

Q21: How should the information in a Nanomaterials Observatory be presented in order to reach the consumers, workers and authorities?

Respondent skipped this question

PAGE 9: Section X - Potential use and benefits of a nanomaterial registry

Q22: In what ways could the information on nanomaterials from registries be potentially useful (tick all that apply):

Respondent skipped this question

Q23: Please give a justification for your views (presented in the previous question) and describe which data would be necessary to allow the desired use (e.g. would information on substances alone be enough for informed consumer purchase decisions, or would this require information for each concerned product):

Respondent skipped this question

Q24: What would be the added value of a European nanomaterial registry beyond the current framework of chemicals legislation, including REACH registration?

Respondent skipped this question

Q25: Please provide any other comments that you would like to share regarding transparency measures for nanomaterials on the market.

Respondent skipped this question
